Note:

- Above fees do not include airfare, hotel accommodation or airport transfers
- The price of this course may seem expensive but it is actually a personal investment that will bring a very fast return. It is very common to perform an average of 1500 to 2500 grafts per session
- To start the hair transplant business, we suggest that you charge no more than US\$3 per graft to be competitive (the average price in USA is US\$5.50 to US\$7 per graft). If you begin to perform 1500 grafts only, it will already generate you a gross income of US\$4500 for your first patient. This implies that after only three patients, you will already have a full return of your investment. This income will increase very quickly as soon as you start performing more grafts per session
